

FIBERGLASS PATIO COVER

Southern Lumber has it “Covered” when it comes to Professional How To Service

LIST OF NEEDED STEPS:

1. Start with developing site plan and design.
2. Determine types of fiberglass panels to be used.
3. Select lumber grade to be used.
4. Determine quantity of “Wiggle” moulding and Closure strip needed.
5. Determine proper type of Flashing needed.
6. Determine type of sealant to be used in between panels.
7. Determine proper type of fasteners to be used.
8. Determine proper type of wood connector to be used and quantity.
9. Select proper finish based on type of material being used.
10. Compile material list.
11. Start by cutting all pieces to length, or have Southern Lumber cut it to size for you.
12. Hand select product or let Southern Lumber do it for you.
